### Subject Stationery

- **Year 8 Technology** – 1 fine Artline pen
- **Year 8 Languages** (French or Japanese) - 1x White Board Marker labelled with own name
- **Years 8 -10 English** – 1x48-page exercise book and earphones
- **Years 8-10 Mathematics** -Students require a calculator which they should still have from Year 7. IF students are needing to buy a new calculator, it is necessary they buy a CASIO fx-100AU PLUS 2<sup>nd</sup> Edition. There is no need to buy a new calculator if they currently own a different scientific calculator model from their previous high school years. However, NESA will soon make the decision that the CASIO fx-100AU PLUS 2<sup>nd</sup> Edition is the essential calculator that does necessary statistics that previous models do not.
- **Year 9 Japanese** – This is an elective subject and only applies to the Japanese students. 1x White Board Marker labelled with own name, 1x 5mm square grid exercise book (to replace lined exercise book)
- **Year 9 NAPLAN** - Please note that Year 9 will require *plug in* (non-Bluetooth/wireless) earphones for NAPLAN testing – these do not need to be high quality.

It is recommended that all books are labelled and covered in contact as it provides longevity and durability to the books.

There may be additional stationery requirements for electives (Years 9 and 10) that will be given to the students upon return to school.
