LINES OF COMMUNICATION 2022

This information is provided to you to facilitate communication between home and the college. Most issues can be resolved very quickly if directed to the correct staff member. To assist you and your daughter, the table below details the lines for effective communication within the college.

First

Issues relating to specific subjects, learning and teaching, which include assignments & tests, homework, resources and equipment, are directed to the **class teacher** in the first instance.

Next

The relevant **Leader of Learning** (see the staff directory).

As well

If it is a specific learning difficulty question you may wish to consult with the **Leader of Learning Support** and/or the **teacher in charge of Disability Provisions**.

Or

If it is a question specific to careers, TAFE, work placement, university entrance you may wish to consult the **Careers Advisor** (Mrs Christine Wilkinson).

Then

The **Leader of Learning and Teaching**, who works with the Leaders of Learning, for issues in relation to college curriculum, student illness and misadventure, student assessment, NESA requirements, reporting etc.

Then

Assistant Principal who works in conjunction with the **Leader of Learning and Teaching** on all areas of the college curriculum, learning and teaching.

Then

The Principal. All appointments with Mr McCudden are via the Principal's personal assistant.

General information

At the completion of Year 11 schools make a judgement about each student's overall achievement of course outcomes for the purpose of credentialing. The NSW Education Standards Authority (NESA) common grade scale for Year 11 describes the level of achievement relating to the set of outcomes in each Preliminary course. The common grade scale, A - E, is used to assist teachers form an overall judgement of a student's achievement for grading purposes as part of their Record of School Achievement (RoSA). The common grade scale for each subject can be found on the NESA website.

The process of determining Preliminary RoSA grades requires teachers to:

- devise and administer assessment tasks that address the knowledge and skills objectives and outcomes of the syllabus;
- observe and record assessment judgements (e.g. marks, grades, comments);
- use all relevant assessment information to make judgements of each student's overall achievements at the end of the course;
- refer to the common grade scale to award a grade that most appropriately describes a student's achievement.

Throughout Year 11 teachers use a variety of activities – homework, assignments, practical work, fieldwork, oral presentations, class tests, formal examinations and such to provide students with essential learning experiences, feedback on areas of strength and weakness and practise for assessment tasks and examinations. Some activities will be nominated to serve as *formal assessment tasks* and will contribute to Preliminary course assessment marks and assist with informing Year 11 RoSA grades.

Assessment task marks achieved during the Preliminary course do not contribute to Higher School Certificate assessment marks. Students are required to satisfactorily complete the requirements of the Preliminary course to progress to the HSC course – a student whose achievement does not meet progression criteria may not be able to continue in that subject for the HSC and faces the risk of having to repeat the Year 11 course.

It is most important that each student works consistently throughout Year 11 applying herself conscientiously to all set tasks, whether formal or informal. For progression to HSC courses, and for the award of the Higher School Certificate, a student must demonstrate **satisfactory attendance, participation and achievement in all courses in which she is enrolled**. It is only through completion of all set tasks that a student will gain a thorough understanding of the course.

HSC: *All My Own Work*

The completion of the NESA program HSC: *All My Own Work* is mandatory for students who are entered in Preliminary courses. It is designed to help students follow the principles and practices of good scholarship. This includes understanding, valuing and using ethical practices when locating and using information as part of their stage 6 studies. Students who have completed the program will also know about penalties for cheating and how to avoid malpractice when preparing their work for assessment.

The online program at [NESA: HSC All My Own Work](#) is delivered flexibly as self-paced learning modules.

Assessment policy and procedures

St Joseph's Catholic College assessment policy has been devised in the light of its Mission Statement, following guidelines laid down by NESAs, to be just to students on an individual basis, to the students in each course as a group, and to the teachers who have responsibility for its implementation.

1.0 Duration of assessment programs

Generally, the Preliminary assessment program will be conducted as follows:

PROGRAM	COURSES	YEAR 11
Preliminary	2 Unit	Terms 1-3
	1 Unit	Terms 1-3
	Extension English and Maths only	Terms 1-3

2.0 Notification of assessment tasks

Notification of assessment tasks will be communicated by specification handout to students in writing **at least two weeks** prior to the due date. For each task, the specification sheet will set out:

- the course (e.g. 2 Unit Ancient History)
- the assessment program (i.e. Preliminary)
- the date and time (e.g. Friday February 9, period 5)
- the weighting - mark value in relation to the total number of marks for the course (e.g. 15%)
- the mode of submission of the task (e.g. hand to class teacher)
- what will be assessed and by what means (e.g. test on Chapter 4 Algebra; report on Long Reef fieldwork)
- the outcomes assessed
- marking schemes
- the task to be completed - a clear outline of the work to be completed
- any additional details (e.g. students will require calculators)

NOTE: It is each student's responsibility to carefully check the details of the assessment task specification sheet. Additionally, if a student is absent when the assessment task notification is issued it is her responsibility to obtain the task information from the class teacher on return to school or otherwise. There will not be a staggered due date because of student absence. Assessment tasks will not be held in the week prior to formal examination periods.

3.0 Presenting assessment tasks

3.1 Hand-in/ prepared tasks

- Assessment tasks are to be submitted clearly labelled with:
 - * NESAs student number on each page
 - * Subject and title of the task
 - * submission date
- Assessment tasks must be submitted **on the date and at the time** indicated on the notification specification sheet, and **only to the person designated** on the notification specification sheet to collect them. If, in exceptional circumstances, it is not possible to submit the task to the person nominated, the student should see the Leader of Learning for the course (see the staff directory page).
- If the Leader of Learning is not available, the student should see the Leader of Learning and Teaching (Mrs McArdle). Any tasks delivered by other members of the student's family must be delivered to the Leader of Learning or Leader of Learning and Teaching. **No tasks are to be handed in at student services/reception or placed in teacher pigeonholes.**

- Assessment tasks submitted via a **USB** must be accompanied by a hard copy (print out). A student who is unable to submit a task because of difficulty with printing must submit the USB to the nominated teacher by the specified time with the task file being in a format which can be accessed by the teacher. An extension of time may be given for the hard copy to be printed on the school's printers. In exceptional circumstances and only with the prior approval by the Leader of Learning for the course, an assessment task may be submitted digitally (e.g. email).
- Computer/technology problems (i.e. loss of data) should be safeguarded by students through backing up, emailing their work to themselves at regular intervals, keeping regular print outs or hard copy drafts. These would be used as evidence in genuine cases through the illness/misadventure appeal process. Computer/printer problems alone are not sufficient grounds for an illness/misadventure appeal. Students are encouraged to complete tasks ahead of time so that last minute technical difficulties can be sorted out in a timely fashion.
- The security of the assessment task prior to submission is the responsibility of the student. No consideration can be given for tasks which have allegedly been lost or stolen.
- It is expected that students must present for the start of the school day when handing in a prepared task, unless illness/misadventure applies. A student who arrives late to school/class must provide relevant documentation to demonstrate illness or misadventure otherwise the student may be deemed to have gained an advantage by taking extra time to complete the task. If this is proven, penalties (as outlined in Section 6) may be applied.

3.2 In-class tasks-tests, examinations, speeches and presentations

- It is expected that each student will bring basic equipment to an assessment task, as well as any special apparatus indicated by the class teacher or on the notification specification sheet. Students should not expect to be allowed to borrow equipment.
- Unless other instructions are given, normal examination conditions will apply to all tasks, including mobile phones being prohibited from the examination room. Note that written instructions are given to each student prior to the formal examination periods detailing specific procedures and behaviour expectations.
- It is expected that students will be present from the start of the school day when test-style assessment tasks or examinations are scheduled, unless illness/misadventure applies. A student who arrives late to school/class must provide relevant documentation to demonstrate illness or misadventure otherwise the student may be deemed to have gained an advantage by taking extra time to prepare for the task. If this is proven, penalties (as outlined in Section 6) may be applied.
- Where two or more classes exist in the same course an in-class assessment task may be scheduled during different periods throughout the school day. Students are reminded of the malpractice provisions of this policy (as outlined in Section 6) and must understand that their interests are best protected by silence and not assisting students in a class who may have a similar task to complete later in the day. Common conditions and marking procedures will occur for all students.
- If a class teacher is absent on the day when an assessment task is due for completion the Leader of Learning will determine whether the task can proceed. If the task needs to be rescheduled all students will be informed and will sign to acknowledge they are aware of the new date and time.

If you are sick on the day of an in-class task/test and you sit for the task no allowance will be made for illness in the marking of that task.

Assessment marks must not be modified to take into account possible effects of illness or domestic situations.

3.3 Invalid assessment tasks

Where there is an irregularity with the integrity of an assessment task, or where there is a problem with its administration, a completed task may have its weighting reduced and a replacement task may be added (with sufficient notice and adjusted weighting). In extreme cases a task may be totally discarded and/or a replacement task arranged.

4.0 Student performance

Assessment tasks will not necessarily be returned to students. However, students will be given timely and meaningful feedback on their performance. This information may be written and/or oral and given in relation to the marking guidelines and course outcomes to assist students in their learning in that course.

Students may be informed of their cumulative ranking at key points throughout the course. It should be noted that such rankings are **interim only** as later tasks generally have greater weightings than tasks completed earlier in the program and as a consequence, rankings may change. At the conclusion of the Preliminary course students can view their RoSA grades in each subject via their *Students Online* account on the NESAs website.

Considerable care is taken in marking Preliminary course assessment tasks. However, if a student believes that her work has been incorrectly graded, she should bring this to the attention of the relevant class teacher or Leader of Learning at the time of the return of the task when the feedback is received.

Students wishing to query their result must do so at the time of receipt of feedback for the task. Appeals in this area will not be considered at a later date.

Assessment task marks are recorded and stored centrally using the college's student management system, Compass. Leaders of Learning match assessment tasks with syllabus weightings and monitor the recording of student marks. Student academic performance in each course is reported to parents twice during the Preliminary course year.

5.0 Non-presentation/attendance of an assessment task

A mark of zero will be awarded when a student does not submit/attend a task on the due date at the specified time, except in cases where the student lodges an illness/misadventure appeal and it is approved. See below for details of the illness/misadventure process:

Every attempt must be made to submit/attend the task on the due date. Parents/students can bring hand-in tasks to the Leader of Learning or Leader of Learning and Teaching if the student is ill on the day it is due.

5.0 Student responsibilities

Assessment marks must not be modified to take into account possible effects of illness or domestic situations.

No allowance is made for a student's poor performance due to illness or misadventure, **students should not attempt an examination or test-style assessment when they are affected by illness or other circumstances.** This means **the student's actual performance, not potential performance, must be assessed in each task according to the published marking guidelines.**

In the case of a task for submission a student who will be absent for more than one day must arrange for the task to be delivered to the Leader of Learning or Leader of Learning and Teaching.

A student returning to school after any absence must see the Leader of Learning or Leader of Learning and Teaching immediately upon their return to school to make arrangements for:

- completion of the same task at an alternate time, *or*
- completion of an alternate task of similar nature, *or*
- in exceptional circumstances, an estimate of performance as deemed appropriate by the Leader of Learning and the Leader of Learning and Teaching.

A student who does not comply with the procedures detailed in this policy, especially the need to contact the Leader of Learning or Leader of Learning and Teaching, may be viewed as attempting to gain an unfair advantage in time and/or knowledge of task, and this may result in the award of a zero mark for that task.

6.0 Penalties

Penalties include the award of a zero mark which can be awarded in two instances: non-presentation of/for a task without approved reason or an attempt to gain unfair advantage over other students.

6.1 Non-presentation

If a task is not attended/submitted by the due date, and the student is not exempted by receiving approval for the illness/misadventure from the Leader of Learning and Teaching, following the appropriate procedure outlined in section 4.0, the Assessment Panel will determine that the student be awarded **a zero mark** for that task. Parents will be notified through an official NESAs non-completion of course warning letter ('N-warning'). Advice on how to satisfactorily meet course requirements will be outlined in this letter; all 'zero' tasks will need to be completed.

If there is no valid reason for failing to complete an assessment task, a zero mark must be recorded for that task.

6.2 Malpractice (cheating or dishonest practices /unfair advantage/plagiarism) and non-serious attempts

All work submitted for assessment must be the student's own: it cannot be copied from another student, plagiarised from reference material, downloaded from the internet, nor completed by nor in collaboration with another student (unless group work is specified in the task specifications), parent, tutor or other.

Any work suspected of not being original will be subjected to further investigation. If proved to be not original work, the Assessment Panel may determine that a zero mark is awarded. **All students involved, whether borrowers or lenders of work, are subject to a zero mark** and parents notified in writing.

Any attempt to gain an unfair advantage over other students in terms of extra time (e.g. taking time off school the day prior to a task or arriving late at school on the due day), additional

knowledge of the nature of a task, non-compliance with stated conditions and examination procedures or such, may result in the awarding of a zero mark with parents being notified. **Any student found with a mobile phone, or similar device such as an internet connected/smart wristwatch, in an examination room will be given a mark of zero.**

If a student's assessment task effort is deemed by the class teacher or Leader of Learning to be non-serious, the matter will be referred to the Leader of Learning and Teaching. If confirmed **a zero mark** may be awarded and parents will be notified. Non-serious attempts include the completion of multiple-choice questions only in an examination, instances where there is no response to a question(s), extremely short or nonsensical responses and inappropriate comments as part of a response. Please note that if a section of an examination is omitted it will contribute its percentage value to the non-completion of 50% of assessment tasks as per NESAs policy.

6.3 Warning to students

If a student is awarded a zero mark for a task and is thus at risk of not meeting the assessment requirements for a course, then

- a written warning will be posted to the college record of student's address, outlining what needs to be completed, and the date for completion,
- a request from the student and her parent(s)/carer(s) for a written acknowledgment is included, and
- a copy of the warning notice is placed in the student's file.

7.0 Satisfactory progression

The Principal will make a decision on the student's pattern of study, options may include:

- *Withholding approval to proceed to Year 12*
- *Provisional enrolment in the HSC course*

The student may be allowed to proceed to the HSC course during Term 4, on a provisional basis, while concurrently satisfying any outstanding Preliminary course requirements. To enable the student to submit her HSC entry form in Term 1 of their Year 12 year, the Principal is required to provide confirmation to NESAs that the student has met all Preliminary requirements.

- *Repeat of a course*

In exceptional cases the Principal may give the student permission to repeat the Preliminary course for which she received an N-determination; in most cases this would necessitate taking the HSC across two years (accumulation).

- *Repeat of Year 11*

The student may have to repeat her full program of studies. The Principal may determine that it is in the student's best interests to do so at another school.

A student will be considered to have satisfactorily completed a course if, in the Principal's view, there is sufficient evidence that the student has:

- (a) followed the course developed or endorsed by the NESAs; and
- (b) applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and
- (c) achieved some or all of the course outcomes

7.1 Identification - attendance

The Year Leader will monitor attendance to identify students of concern i.e. students with unexplained absences, including arrival at school after period 1, for which no absence note has been provided in the seven days following return to school. Absence from class may result in the non-completion of course requirements. The Year Leader will issue a written warning to parents of students of concern. If absence continues the Assessment Panel will review the student's performance to determine if she is achieving course outcomes and applying herself with due diligence to the set tasks and experiences provided in the course.

Application/achievement/class attendance

The class teacher has the first responsibility to determine whether a student's progress in the course is satisfactory, whether her achievement is at a level consistent with her ability. Factors that might affect this include attendance at lessons – late arrival, unexplained absence, extended absence, unsatisfactory effort in completing formal and informal set tasks, inappropriate and inattentive classroom behaviour.

At regular intervals, progress sheets will be issued to class teachers for them to make comment on student performance. The sheets will request information on students for whom the teacher has documentation (e.g. dates of missed tasks, detention forms, diary entries) showing them to be at risk.

A student may not have satisfactorily achieved course outcomes if there is sufficient evidence of failure to fulfil course completion criteria e.g. significant omission of experiences that are integral requirements of the syllabus – class work, practical work, field work, assignments etc.

7.2 Notification

The Leader of Learning will issue a warning letter on behalf of the Principal to students with identified unsatisfactory progression. Warning letters outline the precise concerns and ways that the student can remedy the situation. These letters assist the Principal in determining whether a student has satisfactorily completed a course. An interview involving the Leader of Learning and class teacher(s) concerned would normally follow the letters being sent.

7.3 Consequences

Where sufficient opportunity has been provided and the student has not complied with the course requirements, an N-determination (unsatisfactory) will be applied. The Principal will:

- issue a letter to parents;
- inform students of their right to appeal and the procedure for such;
- submit the N-determination to NESAs.

Where an N-determination is applied:

- in a 1 or 2 unit course, that course will not contribute to the required pattern of study;
- in the common component of related courses (e.g. 2 unit Mathematics Advanced for a student enrolled in Mathematics Extension 1), that course and the related additional course will not contribute in that year to the required pattern of study;
- in the Extension 2 additional course, that course only will not contribute in that year.

8.0 Student transfers

For Year 11 students who transfer to St Joseph's Catholic College prior to the end of Term 2, RoSA grades are based on those tasks that have been completed since the time of arrival at the college. For these students, each task is worth more than the stated amount taking into account the value of the component(s) missed.

9.0 Disability provisions

Students seeking disability provisions (e.g. extra time, reader, writer, enlarged print, separate supervision) need to have their requests registered with the teacher-in-charge of disability provisions. The Principal may approve applications for disability provisions for assessment tasks in Preliminary courses. It is the responsibility of the student to arrange with the Leader of Learning and the teacher-in-charge of disability provisions, well in advance of an assessment task for these disability provisions to be made.

ASSESSMENT PROGRAMS

Each course offered at St Joseph's College has its own assessment program which meets the NESA requirements and accords with the college policy contained within this booklet. As the objectives set out in the NESA syllabus varies from course to course, so too, will the nature and number of assessment tasks.

The following pages set out an overview of the assessment programs and schedules for individual courses. All assessment policies and procedures outlined in this handbook apply to all courses offered within the college.

As dual-accredited vocational education courses (VET), the industry frameworks – Hospitality, Business Services and Retail Services courses have ongoing assessment carried out within both the classroom and the workplace. A record of student achievement is maintained in a Student Log that is signed by the teacher or workplace assessor. A Preliminary assessment mark is not provided in the same mode as other non-VET courses.

Pathways students

Accumulating and accelerating students are subject to all procedures outlined in this policy statement. Special arrangements will be made for students in consultation between the student, Leader of Learning, Leader of Learning and Teaching and Principal.

Scheduling assessment tasks

Every attempt has been made to provide an even spread of assessment tasks across the available weeks of the school year. The special requirements of some programs, however, mean that there will be unavoidable 'peak hour traffic' times for assessments.

The need for an *assessment free* zone prior to examination periods has been recognised and tasks are not scheduled at such times. Exceptions occur when the scheduling of the task at an earlier time would in fact increase the pressure of work on the students concerned.

It is essential that students carefully organise their time to ensure that they are able to perform each task to the best of their ability. Students are encouraged to write their assessment task dates on calendars and place these above their workspaces at home.

EXPLORING EARLY CHILDHOOD

Course: Preliminary
Category: CEC (non-ATAR)
Assessment period: 2022

OUTCOMES	
Code	Descriptor
	<i>A student:</i>
1.1	analyses prenatal issues that have an impact on development
1.2	examines major physical, social-emotional, behavioural, cognitive and language development of young children
1.3	examines the nature of different periods in childhood – infant, toddler, preschool and the early school years
1.4	analyses the ways in which family, community and culture influence the growth and development of young children
1.5	examines the implications for growth and development when a child has special needs
2.1	analyses issues relating to the appropriateness of a range of services for different families
2.2	critically examines factors that influence the social world of young children
2.3	explains the importance of diversity as a positive issue for children and their families
2.4	analyses the role of a range of environmental factors impacting on the lives of young children
2.5	examines strategies that promote safe environments
3.1	evaluates strategies that encourage positive behaviour in young children
4.1	demonstrates appropriate communication skills with children and/or adults
4.2	interacts appropriately with children and adults from a wide range of cultural backgrounds
4.3	demonstrates appropriate strategies to resolve group conflict
5.1	analyses and compares information from a variety of sources to develop an understanding of child growth and development
6.1	demonstrates an understanding of decision making processes
6.2	critically examines issues including beliefs and values that may influence interactions with others

FOOD TECHNOLOGY

Course: Preliminary
Category: BDC
Assessment period: 2022

OUTCOMES	
Code	Descriptor
	A student:
P1.1	identifies and discusses a range of historical and contemporary factors which influence the availability of particular foods.
P1.2	accounts for individual and group food selection patterns in terms of physiological, psychological, social and economic factors
P2.1	explains the role of food nutrients in human nutrition
P2.2	identifies and explains the sensory characteristics and functional properties of food
P3.1	assesses the nutrient value of meals/diets for particular individuals and groups
P3.2	presents ideas in written, graphic and oral form using computer software where appropriate
P4.1	selects appropriate equipment, applies suitable techniques and utilises safe and hygienic practices when handling food
P4.2	plans, prepares and presents foods which reflect a range of the influences on food selection
P4.3	selects foods, plans and prepares meals/diets to achieve optimum nutrition for individuals and groups
P4.4	applies an understanding of the sensory characteristics and functional properties of food to the preparation of food products
P5.1	generates ideas and develops solutions to a range of food situations

COMPONENTS		WEIGHTINGS
A	Knowledge and understanding of course content	40
B	Knowledge and skills in designing, researching, analysing and evaluating	30
C	Skills in experimenting with and preparing food by applying theoretical concepts	30

GEOGRAPHY

Course: Preliminary
Category: BDC
Assessment period: 2022

OUTCOMES	
Code	Descriptor
	<i>A student:</i>
P1	differentiates between spatial and ecological dimensions in the study of geography
P2	describes the interactions between the four components which define the biophysical environment
P3	explains how a specific environment functions in terms of biophysical factors
P4	analyses changing demographic patterns and processes
P5	examines the geographical nature of global challenges confronting humanity
P6	identifies the vocational relevance of a geographical perspective
P7	formulates a plan for active geographical inquiry
P8	selects, organises and analyses relevant geographical information from a variety of sources
P9	uses maps, graphs and statistics, photographs and fieldwork to conduct geographical inquiries
P10	applies mathematical ideas and techniques to analyse geographical data
P11	applies geographical understanding and methods ethically and effectively to a research project
P12	communicates geographical information, ideas and issues using appropriate written and/or oral, cartographic and graphic forms

COMPONENTS		WEIGHTINGS
